### PRODUCT DESCRIPTION

#### PTFE NON-STICK HEAT PRESS COVER SHEET | 16" X 24" | 2 SHEET PACK

Essentialware's non-stick cover sheets are top quality, 5 mil, industrial strength, Triple-Coated advanced fluoropolymer (PTFE) fabric that outperforms other 16" x 24", 2 sheet pack, non-stick Teflon cover sheets. This sheet is a necessity when using sublimation or heat transfers. It protects the garment and machine from bleeding and ghosting when using colored transfers.

**\*Note\* For orders over 100 units, please tab over to Inquire About This Product for a custom quote.**

#### PTFE NON-STICK COVER SHEET FEATURES & BENEFITS

- Waterproof & Washable - messy substances like glue, wax or clay effortlessly wipe away
- Heat Resistance & Non Stick - Heat press transfer sheets allow high temperature resistance up to 600° to protect your working surface, perfect for heat press
- Reusable & Tear Resistant - Our sheets are made from triple-coated fiberglass, tear resistant and durable
- Wide Application - PTFE Teflon Sheets can protect clothes during ironing, heat press transfers and other crafting projects,. Other uses included baking, cooking, and conveying.

- Can be cut to any size - This sheet can be used for a wide variety of craft projects. Just trim the sheet to size

### **Tips for a Better Transfer**

1. Remember to **adjust your heat** press pressure to accommodate for the pad and material you're transferring to
2. Begin every press with a **fresh transfer sheet**
3. **Tape down** your image so you don't get a duplicate image, known as **ghosting**
4. Remove the transfer in **one quick, fluid motion**
5. Learn more about heat conduction and best practices [here](#), in our new [Learning Center](#).
