PRODUCT DESCRIPTION

PTFE NON-STICK MESH WAVE TRAY | 10" X 10"

PTFE wave trays create 360° heat and airflow around food products, optimal space distribution, and heat dissipation to get a crispier, evenly baked final product every time. Waves are 4" tall at their peak, and usable in all commercial and home ovens and microwaves.

Ideal for:

- hot dogs
- tacos
- tacquitos
- mozzarella sticks

PTFE Non-stick Baskets and Mesh products are made from FDA-approved PTFE material and are food safe. Essentialware's baskets are produced to outperform and outlast other PTFE trays. Do not allow basket or mesh surface to come into direct contact with flame or radiant oven coils.

This PTFE mesh wave tray is 10" x 10", shipped 1 in a pack.

We recommend using oven paddle for insertion and removal of basket to extend product life. Do not use metal tongs.
