PRODUCT DESCRIPTION

PTFE NON-STICK SUBLIMATION ROLL | 17" X 36 YDS

Essentialware's non-stick 36 yard rolls are top quality, 5 mil, Triple-Coated advanced fluoropolymer (PTFE) fabric that outperforms other producers. This fabric is a necessity when using sublimation or heat transfers. It protects the garment and machine from bleeding and ghosting when using colored transfers.

TIPS FOR A BETTER TRANSFER

1. Remember to **adjust your heat** press pressure to accommodate for the pad and material you're transferring to
2. Begin every press with a **fresh transfer sheet**
3. **Tape down** your image so you don't get a duplicate image, known as **ghosting**
4. Remove the transfer in **one quick, fluid motion**

ADDITIONAL INFORMATION

Weight	11 lbs
Dimensions	18 × 6 × 6 in
Model	QS12
