Categories: [PTFE Cover Sheets](#), [Specialty Graphics](#)

PRODUCT DESCRIPTION

PTFE NON-STICK UPPER PLATEN WRAP | 16" X 20"

Essentialware's non-stick platen wraps are top quality, 5 mil, industrial grade, Triple-Coated advanced flouropolymer (PTFE) fabric that outperforms other non-stick cover sheets. These wraps are a necessity when using sublimation or heat transfers. It protects the garment and machine from bleeding and ghosting when using colored transfers, and can be used with zippers & buttons, shoes, hats, umbrellas, tote & sport bags, and more.

TIPS FOR A BETTER TRANSFER

1. Remember to **adjust your heat** press pressure to accommodate for the pad and material you're transferring to
2. Begin every press with a **fresh transfer sheet**
3. **Tape down** your image so you don't get a duplicate image, known as **ghosting**
